

THE GLOBAL INNOVATOR
FOR CONFIGURATOR™

Integration of Oracle Configurator & AutoVue

*for automatic generation
of 2D & 3D diagrams*

REDUCE ORDER
LEAD-TIME FROM
DAYS TO HOURS

ONLY FROM LATIS TECHNOLOGIES

ORACLE Gold Partner

Optimize Now

Robust integration of Oracle Configurator and Oracle AutoVue.

Latis Speeds You to Success with an Integration of AutoVue with Configurator

Latis realized there was a need for a dynamic design-generation tool that would integrate seamlessly with Oracle Configurator and offer significant time-saving and money-saving benefits.

As an Oracle Partner devoted to Configure-to-Order implementation,

we worked in collaboration with the product teams of Oracle

Configurator and Oracle AutoVue to achieve a seamless integration of the two tools. As a result, Latis is the only company that can

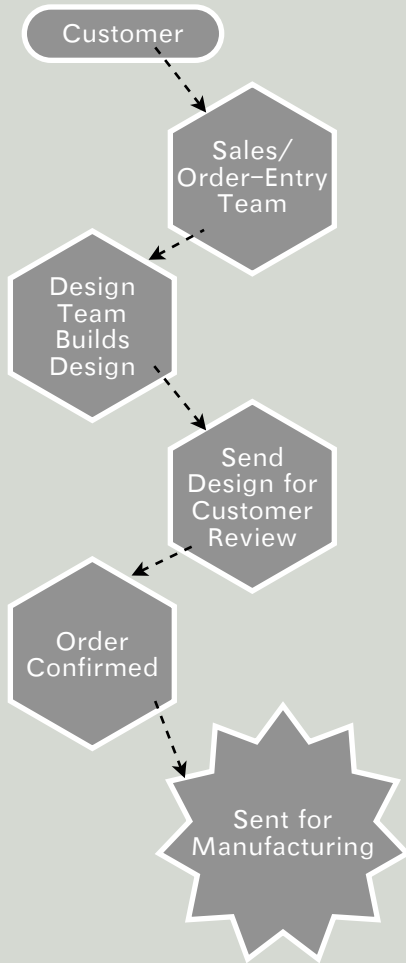

offer you this groundbreaking new integration.

Today, it's more important than ever for companies to optimize design and configuration processes across all platforms.

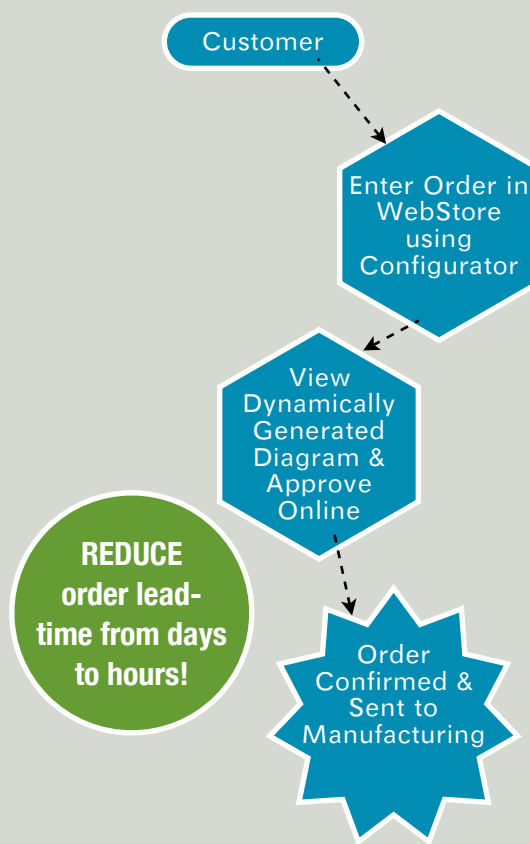

ADVANTAGES OF AUTOVUE INTEGRATION	EFFICIENT	ECONOMICAL	CUSTOMER CONFIDENCE
	<p>Saves Time It reduces the order lead-time required to process customer orders by automatically generating designs for customer-configured products, so the designs can be sent to the customer for approval within hours, not days.</p>	<p>Saves Money The integration eliminates the need for resource time from your engineering team to generate the designs for configured orders. So your engineers are free to accomplish other tasks.</p>	<p>Enhances Customer Satisfaction The prompt visualization of dynamically configured products gives customers increased confidence that their order will be fulfilled to specifications and delivered in a timely manner.</p>

Other Benefits of AutoVue Integration

Current Process

Simplified Process

Latis: Your Configurator Specialist

Latis is the only company in the United States that is entirely devoted to implementing Oracle E-Business Suite for customers with configure-to-order processes.

Seamless Integration

You can be confident that your integration of Configurator with AutoVue will proceed seamlessly, because of our unrivaled experience with Configurator.

CONVENIENT SERVICE LOCATION

We offer you the convenience of an expertly staffed office in Washington, DC.

About Oracle AutoVue -- for dynamically generated 2d and 3d designs

AutoVue is a proven viewing software that is capable of high-fidelity support for hundreds of technical file formats.

- Provides 2D and 3D file viewing.

- Supports file formats from AUTOCAD, Solidworks, Pro-E and many others.

- Integrates your PLM systems to fetch the latest design files and render the design according to customer configurations by dynamically manipulating them.
